**FIRST FINANCIAL BANCORP. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2006**

(Unaudited, dollars in thousands, except per share data)

The consolidated financial statements for interim periods are unaudited; however, in the opinion of the management of First Financial Bancorp. (First Financial), all adjustments (consisting of only normal recurring adjustments) necessary for a fair presentation have been included.

NOTE 1: BASIS OF PRESENTATION

The consolidated financial statements of First Financial, a bank holding company, include the accounts of First Financial and its wholly-owned subsidiaries - First Financial Bank, N.A. and First Financial Capital Advisors LLC, a registered investment advisory company. All significant intercompany transactions and accounts have been eliminated in consolidation.

The accompanying financial statements have been prepared in accordance with the instructions for Form 10-Q and, therefore, do not include all information and footnotes necessary to be in conformity with U.S. generally accepted accounting principles for annual financial statements.

The consolidated balance sheet at December 31, 2005, has been derived from the audited financial statements at that date, but does not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements for annual periods. For further information, refer to the consolidated financial statements and footnotes thereto included in the First Financial Bancorp. Annual Report on Form 10-K for the year ended December 31, 2005.

First Financial adopted the provisions of SFAS No. 123(R), Share-Based Payment, effective January 1, 2006, using the modified-prospective transition method which requires measurement of compensation cost for all stock-based awards at fair value on date of grant and recognition of compensation expense over the service period for awards expected to vest. This Statement applies to all awards granted after January 1, 2006 and to awards modified, repurchased, or cancelled after that date. Prior to January 1, 2006, First Financial accounted for its stock options under the intrinsic value method of APB Opinion No. 25, Accounting for Stock Issued To Employees and related Interpretations, and applied the disclosure-only provisions of SFAS No. 123, Accounting for Stock-Based Compensation. First Financial's employee stock options have fixed terms and the exercise price of the stock options equals the market price on the date of grant. Therefore, no compensation cost was recognized for stock options prior to January 1, 2006.

Certain reclassifications of prior year's amounts have been made to conform to current year presentation. Such reclassifications had no effect on earnings.

NOTE 2: DISCONTINUED OPERATIONS

On September 16, 2005, First Financial completed the sale of substantially all of the assets and certain liabilities of its Fidelity Federal Savings Bank subsidiary to Mutual Federal Savings Bank, a subsidiary of *MutualFirst* Financial, Inc. of Muncie, Indiana. Fidelity Federal is reported as a discontinued operation for financial reporting purposes for all prior periods presented. The results of its operations and its cash flows have been removed from First Financial's results of continuing operations for all periods presented.

The results of Fidelity Federal are presented as discontinued operations in a separate category on the income statement following the results from continuing operations. The income from discontinued operations for the nine months and three months ended September 30, 2005 is as follows:

Table of Contents

	Nine months ended September 30, 2005	Three months ended September 30, 2005
Interest income		
Loans, including fees	\$ 4,034	\$ 1,163

Income before taxes	10,949	10,226
Income tax expense	3,824	3,561
Net earnings	\$ 7,125	\$ 6,665

NOTE 3: FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISK

In the normal course of business, First Financial offers a variety of financial instruments with off-balance sheet risk to its customers to aid them in meeting their requirements for liquidity and credit enhancement and to reduce its own exposure to fluctuations in interest rates. These financial instruments include standby letters of credit and

commitments outstanding to extend credit. A discussion of these instruments follows.

First Financial's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for standby letters of credit and commitments outstanding to extend credit is represented by the contractual amounts of those instruments. First Financial uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. Following is a discussion of these transactions.

Table of Contents

Standby letters of credit are conditional commitments issued by First Financial to guarantee the performance of a customer to a third party. First Financial's portfolio of standby letters of credit consists primarily of performance assurances made on behalf of customers who have a contractual commitment to produce or deliver goods or services. The risk to First Financial arises from its obligation to make payment in the event of the customer's contractual default. As of September 30, 2006, First Financial had issued standby letters of credit aggregating \$25,489 compared to \$38,296 issued as of December 31, 2005. Management conducts regular reviews of these instruments on an individual customer basis, and the results are considered in assessing the need to provide for losses. Management does not anticipate any material losses as a result of these letters of credit.

Loan commitments are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. First Financial evaluates each customer's creditworthiness on an individual basis. The amount of collateral obtained, if deemed necessary by First Financial upon extension of credit, is based on management's credit evaluation of the counterparty. The collateral held varies, but may include securities, real estate, inventory, plant, or equipment. First Financial had commitments outstanding to extend credit totaling \$588,154 at September 30, 2006, and \$523,276 at December 31, 2005. Management does not anticipate any material losses as a result of these commitments.

NOTE 4: COMPREHENSIVE INCOME

First Financial discloses comprehensive income in the Consolidated Statements of Changes in Shareholders' Equity. Disclosure of the reclassification adjustments for the nine and three months ended September 30, 2006, and 2005 are shown in the table below.

	Nine months ended September 30,		Three months ended September 30,	
	2006	2005	2006	2005
Net Income	\$ 20,444	\$ 35,099	\$ 12,119	\$ 14,484
Other comprehensive income, net of tax:				
Unrealized holding (losses) gains arising during period	(1,006)	(3,572)	3,294	(1,827)
Less: Reclassification adjustment for (losses) included in net income	(301)	0	0	4
Other comprehensive income	(705)	(3,572)	3,294	(1,831)
Comprehensive income	\$ 19,739	\$ 31,527	\$ 15,413	\$ 12,653

At September 30, 2006, the unfunded pension losses, net of taxes, recorded as accumulated comprehensive income are \$7,562.

NOTE 5: DERIVATIVES

The use of derivative instruments allows a bank to meet the needs of its customers while reducing the interest-rate risk associated with certain transactions. In 2001, First Financial's board of directors approved a policy authorizing the use of certain derivative products. The approved derivative instruments included interest rate caps, floors, and swaps. Currently, First Financial utilizes interest rate swaps as a means to offer long-term fixed-rate loans to commercial borrowers while maintaining the variable-rate income that better suits First Financial's funding position. First Financial designates its derivatives based upon criteria established by SFAS No. 133, as amended by SFAS No. 138, Accounting for Certain Derivative Instruments and Certain Hedging Activities, an Amendment to FASB Statement No. 133, and SFAS No. 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities. The following table summarizes the derivative financial instruments utilized by First Financial:

Table of Contents

	September 30, 2006			December 31, 2005			September 30, 2005

NOTE 6: OTHER LONG-TERM DEBT

Other long-term debt, which appears on the balance sheet, consists of junior subordinated debentures owed to two unconsolidated subsidiary trusts. Capital securities were issued in the third quarter of 2003 by a statutory business trust First Financial (OH) Statutory Trust II and in the third quarter of 2002 by another statutory business trust First Financial (OH) Statutory Trust I. First Financial owns 100% of the common equity of both of the trusts. The trusts were formed with the sole purpose of issuing the capital securities and investing the proceeds from the sale of such capital securities in the debentures. The debentures held by the trust are the sole assets of each trust. Distributions on the capital securities are payable quarterly at a variable rate of interest, which is equal to the interest rate being earned by the trust on the debentures and are recorded as interest expense of First Financial. The interest rate is variable and is subject to change every three months. The base index is the three-month LIBOR (London Inter-Bank Offered Rate). On September 30, 2006, the rates on Trust I and Trust II were 8.77% and 8.60%, respectively. First Financial has the option to defer interest for up to five years on the debentures. However, the covenants prevent the payment of dividends on common stock if the interest is deferred. The capital securities are subject to mandatory redemption, in whole or in part, upon repayment of the debentures. First Financial has entered into agreements which, taken collectively, fully or unconditionally guarantee the capital securities subject to the terms of the guarantees. The debentures qualify as Tier I capital under Federal Reserve Board guidelines. The debentures issued in 2003 are first redeemable, in whole or in part, by First Financial on September 30, 2008 and mature on September 30, 2033. The amount outstanding, net of offering costs, as of September 30, 2006, was \$20,000. The debentures issued in 2002 are first redeemable, in whole or in part, by First Financial on September 25, 2007, and mature on September 25, 2032. The amount outstanding, net of offering costs, as of September 30, 2006, was \$10,000.

NOTE 7: STOCK OPTIONS AND AWARDS

First Financial adopted the provisions of SFAS No. 123(R) effective January 1, 2006, using the modified-prospective transition method, which requires measurement of compensation cost for all stock-based awards at fair value on the date of grant and recognition of compensation expense over the service period for awards expected to vest. Share-based compensation expense for stock options and restricted stock awards included in salaries and employee benefits expense for the first nine months of 2006 was \$1,306 and for the third quarter of 2006 was \$531. Total unrecognized compensation cost related to nonvested share-based compensation was \$4,969 at September 30, 2006 and is expected to be recognized over a weighted average period of 2.6 years.

Table of Contents

Under the intrinsic method of accounting, compensation expense had not been recognized in the prior year statements of earnings for stock-based compensation plans, other than for restricted stock awards. The following table illustrates the effect on net earnings and earnings per share if First Financial had applied the fair value recognition provisions of SFAS No. 123 to stock-based compensation for the nine and three months ended September 30, 2005:

	Nine Months Ended September 30, 2005	Three Months Ended September 30, 2005
Net earnings, as reported	\$ 35,099	\$ 14,484
Add: Restricted stock expense, net of taxes, included in net income	916	288
Deduct: Total stock-based employee compensation expense determined under the fair value based method for all awards, net of related tax effects	1,098	362
Pro forma net earnings	\$ 34,917	\$ 14,410
Earnings per share		
Basic - as reported	\$ 0.81	\$ 0.33
Basic - pro forma	\$ 0.80	\$ 0.33
Diluted - as reported	\$ 0.81	\$ 0.33
Diluted - pro forma	\$ 0.80	\$ 0.33

As of September 30, 2006, First Financial had two stock-based compensation plans. The 1991 Stock Incentive Plan provides incentive stock options and stock awards to certain key employees and non-qualified stock options to directors of First Financial who are not employees for up to 1,691,036 common shares of First Financial. The options are not exercisable for at least one year from the date of grant and are thereafter exercisable for such periods (which may not exceed 10 years) as the board of directors, or a committee thereof, specifies, provided that the optionee has remained in the employment of First Financial and its subsidiaries. All options expire at the end of the exercise period, and forfeited or expired options become available for re-issuance. On April 27, 1999, the shareholders approved the 1999 Stock Incentive Plan that provides for 7,507,500 shares for similar awards and options.

The fair value of stock options is determined using the Black-Scholes valuation model. The expected dividend yield is based on historical dividend payouts; the expected volatility is based on historical volatilities of company stock for a period approximating the expected life; the risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant for periods corresponding with the expected life of the option; and the expected life represents the period of time the options are expected to be outstanding and is based on historical trends. The weighted average assumptions used in the computations are as follows:

Table of Contents

	Nine Months Ended September 30, 2005 Pro	
	2006	Forma
Fair value of options granted	\$ 2.88	\$ 2.79
Expected dividend yield	4.00%	3.64%
Expected volatility	0.210	0.210
Risk-free interest rate	4.95%	3.91%
Expected life	6.88	5.23

Activity in the above plan for the nine months ended September 30, 2006 is summarized as follows:

	Nine Months Ended September 30, 2006			
	Number of shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Outstanding at beginning of year	1,609,945	\$ 17.43		
Granted	554,400	16.04		
Exercised	(59,013)	14.65		
Forfeited or expired	(151,903)	17.67		
Outstanding at end of quarter	1,953,429	\$ 17.10	6.69	\$ 84,023
Exercisable at end of quarter	1,108,488	\$ 17.50	4.76	\$ 77,023

Intrinsic value for stock options is defined as the difference between the current market value and the grant price. The total intrinsic value of options exercised during the first nine months of 2006 was \$188 and for the third quarter of 2006 was \$0. The weighted average grant date fair value of options granted during the first nine months of 2006 was \$2.88 and for the third quarter of 2006 was \$2.57. Cash received from stock options exercised during the first nine months of 2006 was \$254 and for the third quarter of 2006 was \$0, and the related tax benefit for tax deductions from stock options and restricted stock expensed for the first nine months of 2006 was \$394 and for the third quarter of 2006 was \$158. First Financial uses treasury shares purchased under the company's share repurchase program to satisfy share-based exercises.

Restricted stock awards have historically been recorded as deferred compensation, a component of shareholders' equity at the fair value of these awards at the grant date and amortized on a straight-line basis to salaries and benefits expense over the specified vesting periods, which is currently four years. For all awards granted prior to 2005 and for awards granted to non-employee directors in 2005 and 2006, the vesting of the awards only required a service period to be met. Therefore, 25% of each grant would vest each of the four years. For restricted stock awards granted to employees in 2005 and 2006, First Financial must meet a performance goal of 12.00% return on equity. Since the return on equity goal was not met in 2005 and the first three quarters of 2006, 25% of the awards granted in 2005 and the first three quarters of 2006 will not vest. However, if the cumulative period average return on equity (grant date through next

Table of Contents

measurement date) is 12.00% or higher, the first year's awards, as well as the second year's awards, will vest in 2006. The following is a summary of activity in restricted stock for the nine months ended September 30, 2006:

	Nine Months Ended September 30, 2006	
	Number of shares	Weighted Average Grant Date Fair Value
Nonvested at beginning of year	218,054	\$ 17.22
Granted	101,898	16.04
Vested	(64,145)	16.97
Forfeited	(10,173)	17.08
Nonvested at end of quarter	245,634	\$ 16.80

The fair value of restricted stock is determined based on the number of shares granted and the quoted price of First Financial's common stock. The total fair value of restricted stock vested during the first nine months of 2006 was \$1,089 and for the third quarter of 2006 was \$0, as no restricted stock vested during the third quarter of 2006.

NOTE 8: EMPLOYEE BENEFIT PLANS

First Financial sponsors a non-contributory defined benefit pension plan covering substantially all employees. As of September 30, 2006, First Financial expects to contribute \$6,583 to its pension plan in 2006. The following table sets forth information concerning amounts recognized in First Financial's Consolidated Balance Sheets and Consolidated Statements of Earnings.

	Nine months ended September 30,		Three months ended September 30,	
	2006	2005	2006	2005
Service cost	\$ 2,786	\$ 2,875	\$ 844	\$ 964
Interest cost	2,264	2,283	760	788
Expected return on plan assets	(2,155)	(2,033)	(734)	(678)
Amortization of transition asset	(42)	(48)	(14)	(16)
Amortization of unrecognized prior service cost	42	44	14	15
Amortization of actuarial loss	902	780	280	284
Net periodic benefit cost	\$ 3,797	\$ 3,901	\$ 1,150	\$ 1,357

Table of Contents

Some of First Financial's subsidiaries maintain health care and, in limited instances, life insurance plans for current retired employees. The following table sets forth the components of net periodic postretirement benefit costs.

	Nine months ended		Three months ended	
	September 30,		September 30,	
	2006	2005	2006	2005
Service cost	\$ 63	\$ 60	\$ 21	\$ 20
Amortization of unrecognized prior service cost	(3)	(3)	(1)	(1)
Amortization of actuarial loss	(3)	(25)	(1)	(9)
Net periodic postretirement benefit cost	\$ 57	\$ 32	\$ 19	\$ 10

NOTE 9: OTHER MATTERS

Core deposit intangibles are amortized on a straight-line basis over their useful lives. Core deposit balances are being amortized over varying periods, none of which exceeds 10 years.

SUMMARY

BRANCH PLAN

The sale of 10 branches and closure of 7 offices was completed in August of 2006. The sale of the 10 offices was completed in three separate transactions. Total net gains on sale were \$12,545 or \$0.20 per share. Total deposits of \$108,629 were assumed and total loans of \$101,414 were sold. The estimated proforma financial impact of the branch sales and closures, excluding the gain on sales, remains earnings neutral.

First Financial will continue to concentrate future growth plans and capital investments in larger metropolitan markets. Smaller markets have historically provided stable, low-cost funding sources to First Financial and are an important part of its funding plan. First Financial's historical strength in a number of these markets should enable it to retain market share.

First Financial's branch strategy is to serve a combination of metropolitan and non-metropolitan markets in Indiana, Ohio, and Kentucky. In addition to geographic fit, each market must have growth potential and the ability to meet profit targets.

Table of Contents

Following the completion of the branch plan, First Financial has 87 offices serving 9 distinct markets with an average branch size of approximately \$33,000. The operating model for growth includes market presidents managing distinct markets with the authority to make decisions at the point of client contact.

INFORMATION TECHNOLOGY UPDATE

First Financial has entered into an agreement with Jack Henry & Associates Inc. to license their software applications, which will be used to provide primary core data processing. This in-house solution provides First Financial with a more cost-effective model. The conversion to the Jack Henry system was completed in October of 2006, and should enhance First Financial's capability to deliver client services in a better, faster, and more efficient manner.

This decision is consistent with the strategic plan and is an integral component of First Financial's comprehensive review of the use of technology. This review includes analysis of our data and voice telecommunication usage, on-line and ATM services, and other ancillary services. Expected savings as a result of this comprehensive review remain between \$3,000 and \$4,000 per year and should be fully recognized in 2007. Costs associated with this conversion will include the early termination of some existing contracts. To-date, \$2,600 in early termination penalties and other one-time charges have been recorded.

OPERATING RESULTS

Net earnings for the first nine months of 2006 were \$20,444 or \$0.52 in diluted earnings per share versus \$35,099 or \$0.81 for the first nine months of 2005. Income from continuing operations for the nine months ended September 30, 2006, was \$20,444 or \$0.52 in diluted earnings per share versus \$27,974 or \$0.64 in diluted earnings per share for the same period in 2005. The \$7,530 decrease in income from continuing operations was due to several material items: net interest income decreased \$6,059; noninterest expense increased \$19,213; and provision for loan losses increased \$1,444. These decreases were offset by an increase in noninterest income of \$17,141. A detailed discussion of these items follows.

Net earnings for the third quarter of 2006 were \$12,119 or \$0.31 in diluted earnings per share, compared to \$14,484 or \$0.33 in diluted earnings per share for the third quarter of 2005. Income from continuing operations for the nine months ended September 30, 2006, was \$12,119 or \$0.31 in diluted earnings per share versus \$7,819 or \$0.18 in diluted earnings per share for the same period in 2005.

Return on average assets for the third quarter of 2006 was 1.40% compared to 1.50% for the same period in 2005.

Return on average shareholders' equity was 16.09% for the third quarter of 2006, versus 15.64% for the comparable period in 2005. Year-to-date return on average assets was 0.79% for 2006, compared to 1.22% for 2005, while return on equity was 9.18% for 2006 versus 12.71% for 2005.

Third quarter of 2006 noninterest income was \$30,429, an increase of \$16,420 or 117.21% from the third quarter of 2005. Third quarter of 2006 noninterest income included \$12,545 from the gain on the sale of the branches and \$2,200 from the gain on the problem loan sale. The third quarter of 2005 included a \$1,649 loss associated with the sale of \$42,000 in indirect loans. Excluding these items, noninterest income remained flat, increasing \$26 or 0.17%, from the third quarter of 2005. First Financial had quarterly increases in service charges on deposit accounts income of \$728 which included the positive effects of its new overdraft program. Bankcard interchange income increased \$123 due to both increased debit card issuance and usage, while bank-owned life insurance income decreased \$155, trust fees decreased \$218, and MSR impairment recapture decreased \$255.

On a linked-quarter basis (third quarter 2006 compared to second quarter 2006), total noninterest income increased \$14,588 or 92.09%. This increase was due to the branch and loan sale gains discussed previously. Excluding these, noninterest income would have decreased \$157. This decrease was primarily due to a \$354 decrease in bank-owned life insurance, offset by a \$241 increase in service charges on deposit accounts related to increases in nonsufficient funds charges.

Year-to-date noninterest income increased \$17,141 or 39.06% from the comparable period in 2005. Excluding previously discussed gains in 2006 and loss in 2005, noninterest income would have increased

Table of Contents

\$747 or 1.64%. This increase is primarily due to increases in service charges on deposit accounts of \$2,473 and an increase of \$493 in miscellaneous collection fees offset by an \$865 decrease in MSR impairment recapture, a \$476 loss on investment securities sold, a \$343 decrease in bank-owned life insurance income, a \$256 decrease in trust fees, and a \$246 decrease in investment advisory fees.

Total noninterest expense increased \$4,602 or 13.25% for the third quarter of 2006 from the third quarter of 2005. This increase was primarily due to increases of \$615 in salaries and benefits, \$337 in occupancy expense, \$1,282 in data processing expenses, \$810 in professional services, \$603 in marketing expense, and \$1,289 in other noninterest expense, somewhat offset by a decrease in equipment expense of \$397. Salaries and benefits increased \$615 due to increased severance-related salaries and benefits expense of \$503 and an increase in production bonuses of \$247. Occupancy expense increased \$337 due to increased maintenance costs. The increase in data processing of \$1,282 is primarily related to early termination fees of \$500 and acceleration of fees of \$300 for the conversion of various systems as well as \$171 in software license amortization. The increase in professional services of \$810 is primarily due to charges associated with the upcoming voice and data telecommunication improvements and with recruiting fees. The \$603 increase in marketing expense is primarily associated with the new branding initiative. The increase in other noninterest expense of \$1,289 consists of increases in various accounts, including \$511 in losses on fixed assets associated with the branch sale and the disposal of personal computers associated with the technology upgrade, approximately \$522 in conversion-related travel and supplies, and \$181 in credit card and merchant interchange expense that was more than offset by the increase interchange income and merchant discount. The \$397 decrease in equipment expense is primarily due to a decrease in equipment expense rent of \$108 and service contracts of \$156 that are not expected to continue.

On a linked-quarter basis, noninterest expense was \$1,362 less than the second quarter. This decrease was due to the offsetting effects of decreases in salaries and benefits of \$3,142, decreases in data processing of \$335, increases in marketing of \$491 primarily due to the branding initiative discussed earlier, and increases in professional services of \$606 primarily due to the data and voice telecommunication upgrade discussed previously. Salaries and benefits decreased \$3,142 due to decreased severance of \$1,905, decreased salaries in period payroll of approximately \$185, decreased healthcare of \$395, and decreased retirement-related expense of \$558. The decrease in data processing of \$335 is due to early termination fees paid in the second quarter offset by early termination fees paid in the third quarter.

Year-to-date noninterest expense increased \$19,213. Excluding the effects of the \$4,295 prepayment penalty recorded in the first quarter of 2006, noninterest expense would have increased \$14,918. The increase is due to increases in salaries and benefits of \$5,875, occupancy expense of \$1,284, data processing of \$3,313, professional services of \$873, and other noninterest expense of \$3,856. Salaries and benefits increased \$5,875 due to severance charges of \$3,453, retirement-related expense of \$1,002, production bonuses of \$658, and healthcare of \$257. Occupancy expense increased \$1,284 due to increased maintenance costs, utilities, and new building rent consistent with First Financial's growth plans. The \$3,313 increase in data processing is primarily due to early termination fees and acceleration of fees discussed previously. The \$873 increase in professional services is primarily due to the data and voice telecommunication upgrade discussed previously as well as consulting associated with a branch staffing model. The \$3,856 increase in other noninterest expense is due to increases in various accounts, including \$799 in travel-related expenses, \$706 in state intangible tax, and \$589 in credit and collection expense.

NET INTEREST INCOME

Net interest income, First Financial's principal source of earnings, is the amount by which interest and fees generated by earning assets exceed the interest costs of liabilities obtained to fund them. For analytical purposes, net interest income is also presented in the table that follows, adjusted to a tax equivalent basis assuming a 35% marginal tax rate for interest earned on tax-exempt assets such as municipal loans, tax-free leases, and investments. This is to recognize the income tax savings that facilitates a comparison between taxable and tax-exempt assets. Management believes that it is a standard practice in the banking industry to present net interest margin and net interest income on a fully tax equivalent basis. Therefore, management believes these measures provide useful information to investors by allowing them to make peer comparisons. Management also uses these measures to make peer comparisons.

Table of Contents

	2006			2005	
	Sep. 30	June 30	Mar. 31	Dec. 31	Sep. 30

Average earning assets	3,109,040	3,117,543	3,235,796	3,405,725	3,429,671
Net interest margin *	3.93%	4.11%	4.04%	3.72%	3.83%
Net interest margin (tax equivalent)	4.01%	4.20%	4.12%	3.80%	3.92%

* Margins are calculated using net interest income annualized divided by average earning assets

Net interest income for the third quarter of 2006 was \$30,823 compared to \$33,143 in the third quarter of 2005, a decrease of \$2,320 or 7.00%. This decrease is due primarily to a planned reduction in earning assets through loan sales, exit of the indirect line of business, and the strategic decision to sell conforming mortgage loan production in the secondary market; compounded by the increase in deposit costs. Net interest income on a linked-quarter basis decreased \$1,124 or 3.52%. Net interest income on a year-to-date basis declined \$6,059 or 6.00%, which is primarily due to the continued effects of increased rates on deposits and account migration to higher yielding products.

First Financial's net interest margin increased to 3.93% in the third quarter of 2006 from 3.83% in the third quarter of 2005. Linked-quarter net interest margin decreased 18 basis points from 4.11% to 3.93% due to the combined effects of the loan mix shift, 3 basis points; commercial loan volume increase, 3 basis points; and other, 2 basis points; offset by the negative effect of the branch sale, 7 basis points; CD portfolio repricing, 12 basis points; and the impact of an increased public fund deposit, 7 basis points. On a year-to-date basis, net interest margin increased 11 basis points from 3.92% in 2005, to 4.03%.

The primary risk to our margin remains unanticipated consumer and competitor behavior in deposit products, specifically the consumer preference for higher-yielding money market accounts rather than more traditional transaction accounts, and the aggressiveness in market pricing for both transaction and certificate of deposit accounts. First Financial is reducing the full year 2006 margin estimate to between 3.95% and 4.00% from a previous estimate of between 4.05% and 4.10%. The reduction is due largely to the effect of a product mix shift in the consumer deposit portfolio.

The Statistical Information that follows is presented on a GAAP basis.

Net interest margin (2)			3.93%			4.11%			3.83%

(1) Nonaccrual loans and loans held for sale are included in average balances for each applicable loan category.

(2) Because noninterest-bearing funding sources, demand deposits, other liabilities, and shareholders equity also support earning

assets, the net
interest margin
exceeds the interest
spread.

Table of Contents**RATE/VOLUME ANALYSIS**

The impact of changes in volume and interest rates on net interest income is illustrated in the following table. As shown, the increase in market interest rates had a significant effect on First Financial's rates impacting both interest income and interest expense for both the nine months and quarter ended September 30, 2006, in comparison to 2005. First Financial's adjustable and variable rate loans repriced upward more quickly than the increase in deposit costs. The decrease in volume on earning assets affected interest income more than the decrease in volume on interest-bearing liabilities affected interest expense, resulting in a decrease to net interest income.

	Nine Months Ended Sep. 30, 2006			Three Months Ended Sep. 30, 2006		
	Over 2005	Change Due To:		Over 2005	Change Due To:	
		Rate	Volume		Rate	Volume
Interest income	\$ 3,769	\$ 18,047	(\$14,278)	\$ 1,584	\$ 6,980	(\$5,396)
Interest expense	9,828	14,156	(4,328)	3,904	5,715	(1,811)
Net interest income	(\$6,059)	\$ 3,891	(\$9,950)	(\$2,320)	\$ 1,265	(\$3,585)

ASSETS

Average loans, net of unearned income, for the third quarter of 2006 decreased \$236,555 or 8.50% from the comparable period a year ago. On a linked-quarter basis, average outstanding loan balances decreased \$67,488 or 2.58%. On a year-to-date basis, average outstanding loan balances decreased \$203,294 or 7.29%. The decrease in the loan portfolio from 2005 was affected by the sale of \$42,000 in indirect marine and recreational vehicle loans at the end of the third quarter of 2005, the sale in the fourth quarter of 2005 of approximately \$64,000 in retail mortgage loans that no longer fit the risk profile of the company, as well as the sale in the third quarter of 2006 of \$38 million in problem loan credits. Furthermore, indirect installment originations ceased in the third quarter of 2005, resulting in approximately \$18,000 in quarterly runoff of this portfolio. Since the end of the second quarter of 2005, the indirect loan portfolio has decreased approximately \$135,000. Additionally, First Financial has made the strategic decision to sell most of the mortgage loan production into the secondary market instead of keeping the loans in its portfolio. In total, First Financial has sold more than \$245,000 in total loans since announcing the Strategic Plan in 2005.

Loan pricing dependency is distributed as follows on average balances for the quarter: prime, Fed Funds, LIBOR, and Treasury based loans represent approximately 68% of the portfolio and 32% are fixed rate.

Securities available for sale were \$329,225 at September 30, 2006, compared to \$554,673 at December 31, 2005. The combined investment portfolio was 11.23% and 16.47% of total assets at September 30, 2006 and December 31, 2005, respectively. In February of 2006, the company sold \$179,000 in investment securities and paid down \$184,000 in Federal Home Loan Bank borrowings. Reliance on wholesale borrowings has been greatly reduced as a result of the restructuring and is likely to continue for the next several quarters as the bank continues to use excess liquidity to fund future growth.

DEPOSITS

Average deposit balances for the third quarter decreased \$7,995 or 0.28% from the comparable period a year ago.

Average deposits decreased \$6,670 or 0.23% on a linked-quarter basis. The decreases from prior periods were primarily due to the sale of approximately \$108,628 in deposits associated with the branch sales. Excluding the branch sales, average deposits would have increased approximately \$39,979 or 1.43% from the second quarter. This increase is primarily due to the increase in a public funds deposit included in the third quarter of 2006.

Year-to-date average deposits decreased 0.08% over the comparable period in 2005. Excluding brokered and public funds time deposits, year-to-date average deposits would have increased 1.21%.

Deposit pricing dependency is distributed as follows on average balances for the quarter: prime, Fed Funds, indexed, and managed rate deposits represent approximately 45% of the portfolio and 55% are fixed.

Table of Contents

A summary of the linked-quarter balance sheet excluding the effects of the branch sales follows:

	2Q06		% Change over Adjusted 2Q06
	Average less Branch Sales	3Q06 Activity	
Deposits (average balances):			
Interest-bearing	\$ 153,607	\$ 67,121	43.70%
Savings	1,041,417	(28,333)	-2.72%
Time	1,190,988	16,535	1.39%
Total interest-bearing deposits	2,386,012	55,323	2.32%
Noninterest-bearing	406,613	(15,344)	-3.77%
Total deposits	\$2,792,625	\$ 39,979	1.43%

INCOME TAXES

Income tax expense related to operating income for the first nine months of 2006 was \$10,859 versus \$12,904 in 2005, with a tax benefit related to securities transactions of \$175 and \$0 for the nine months ended September 30, 2006 and 2005, respectively. Tax expense related to discontinued operations totaled \$0 and \$3,824 for the nine months ended September 30, 2006, and 2005, respectively. Tax expense related to operating income totaled \$6,911 and \$3,250 for the three months ended September 30, 2006 and 2005, respectively, with no tax benefit related to securities transactions for the three months ended September 30, 2006 and \$2 of tax expense related to securities transactions for the three months ended September 30, 2005. Tax expense related to discontinued operations totaled \$0 and \$3,561 for the three months ended September 30, 2006, and 2005, respectively.

First Financial's overall effective tax rates for the first nine months of 2006 and 2005 were 34.69% and 32.28%, respectively. The effective tax rate for income from continuing operations was 31.57% and for income from discontinued operations was 34.93% for the nine months ended September 30, 2005. First Financial's overall effective tax rate for the third quarter of 2006 was 36.32% compared to 31.98% for the same period in 2005. The effective tax rate for income from continuing operations was 29.36% and for income from discontinued operations was 34.82% for the third quarter of 2005. The 2006 increase in the effective rate is primarily due to the third quarter recognition of \$1,032 in income tax expense as a result of an Internal Revenue Service audit of two prior year tax returns. The effect of this tax adjustment was approximately \$0.03 per share and is not expected to recur.

LOAN SALE

First Financial completed its previously announced sale of 193 problem credits as part of its strategy to reduce overall credit risk in the loan portfolio. The sale involved \$38,098 in primarily substandard commercial, commercial real estate, and retail real estate loans that were transferred to loans held for sale at the lower of cost or estimated fair value of \$28,349. The loans were purchased by five independent parties for a combined price of \$31,162. The gain associated with the problem loan sale previously announced was \$2,200 or approximately \$0.04 per share resulting from a sale price in excess of the estimated value reported in the second quarter. The ongoing annual impact of the loan sale is estimated to be a reduction of net interest income of \$181 due to the reduction of certain earning assets and the redeployment of the nonaccrual loans that were nonearning assets.

ALLOWANCE FOR LOAN LOSSES

The allowance for loan losses is maintained at a level believed adequate by management to absorb estimated probable credit losses. Management's periodic evaluation of the adequacy of the allowance is based on First Financial's past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay (including the timing of future payments), the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions, and other relevant factors. This evaluation is inherently subjective, as it requires material estimates including the amounts and timing of future cash flows expected to be received on impaired

loans that may be

Table of Contents

susceptible to significant change. The evaluation of these factors is completed by a group of senior officers from the risk management, credit administration, financial, and lending areas.

The provision for loan losses for the third quarter of 2006 was \$2,888 compared to \$1,351 for the same period in 2005. Net charge-offs were \$1,085 for the third quarter of 2006, or \$1,736 less than the \$2,821 net charge-offs recorded for the third quarter of 2005. Year-to-date net charge-offs were \$14,597 in 2006. Year-to-date net charge-offs, excluding the effect of the loan sale write-down recorded in the second quarter of 2006, were \$6,241 in 2006, up \$645 from \$5,596 recorded in 2005. Including the write-down, net charge-offs were up \$9,001 for the nine months ended September 30, 2006 from the comparable period in 2005. The percentage of net charge-offs to average loans for the third quarter of 2006 was 0.17% compared to 0.40% for the same period in 2005 and 1.68% for the linked quarter. Excluding the effect of the loan sale write-down, net charge-offs to average loans in the second quarter of 2006 was 0.40%. The percentage of net charge-offs to average loans was 0.75% for year-to-date 2006 compared to 0.27% for the same period in 2005. Excluding the effect of the loan sale write-down, net charge-offs to average loans was 0.32% for year-to-date 2006.

The allowance to ending loans ratio as of September 30, 2006, was 1.27% versus 1.54% for the same quarter a year ago and 1.15% as of June 30, 2006. It is management's belief that the allowance for loan losses of \$31,888 is adequate to absorb probable credit losses inherent in the portfolio, and the changes in the allowance and the resultant provision are consistent with the internal assessment of the risk in the loan portfolios.

IMPAIRED LOANS

At September 30, 2006, and 2005, the recorded investment in loans that are considered to be impaired under FASB Statement No. 114 was \$5,305 and \$2,957, respectively. The related allowance for loan losses on these impaired loans was \$2,997 at September 30, 2006, and \$1,330 at September 30, 2005. At September 30, 2006 and 2005, there were no impaired loans that did not have an allowance for loan losses. The average recorded investment in impaired loans for the quarters ended September 30, 2006, and 2005, was approximately \$7,312 and \$3,147. For the nine months and quarter ended September 30, 2006, First Financial recognized interest income on those impaired loans of \$161 and \$9 compared to \$64 and \$29 for the same period in 2005. First Financial recognizes income on impaired loans using the cash basis method. The table that follows indicates the activity in the allowance for loan losses for the quarters presented.

	Quarter Ended				
	2006 Sep. 30	2006 June 30	2006 Mar. 31	2005 Dec. 31	2005 Sep. 30
Balance at beginning of period	\$ 30,085	\$ 40,656	\$ 42,485	\$ 42,036	\$ 43,506
Provision for loan losses	2,888	360	752	3,015	1,351
Loans charged off	(2,157)	(3,655)	(3,265)	(3,318)	(3,333)
Loans held for sale write-down	0	(8,356)	0	0	0
Recoveries	1,072	1,080	684	752	512
Net charge-offs *	(1,085)	(10,931)	(2,581)	(2,566)	(2,821)
Balance at end of period	\$ 31,888	\$ 30,085	\$ 40,656	\$ 42,485	\$ 42,036

Ratios:

Allowance to period end loans, net of unearned income	1.27%	1.15%	1.56%	1.62%	1.54%
Recoveries to charge-offs *	49.70%	8.99%	20.95%	22.66%	15.36%
Allowance as a multiple of net charge-offs *	29.39	2.75	15.75	16.56	14.90

* Excluding the loans held for sale write-down, net charge-offs in the second quarter of 2006 were \$2,575, the recoveries to charge-offs ratio was 29.55%, and the allowance as a multiple of net charge-offs ratio was 11.68.

Table of Contents**NONPERFORMING/UNDERPERFORMING ASSETS**

Total underperforming assets, which includes nonaccrual loans, restructured loans, other real estate owned, and loans 90 days or more past due and still accruing, decreased \$6,803 to \$22,942 at the end of the third quarter of 2006 from \$29,745 at the end of the third quarter of 2005. The decrease in underperforming assets is due to a decrease in nonaccrual loans of \$5,871 primarily attributable to the impact of the loan sale. A large percentage of the underperforming loans are secured by real estate. On a linked-quarter basis, total underperforming assets decreased \$6,956 of which nonaccrual loans decreased \$5,272 primarily attributable to the impact of the loan sale. Excluding loans held for sale, total underperforming assets on a linked-quarter basis increased \$7,095. The increase in underperforming assets on a linked-quarter basis is due to an increase in nonaccrual loans of \$6,490 primarily attributable to eight commercial and commercial real estate loan client relationships totaling \$4,061. First Financial is actively focused on the nonaccrual loans remaining in the portfolio subsequent to the loan sale. Despite the increase in the nonaccrual loans on a linked quarter basis, First Financial does not believe that this is indicative of an overall degradation in the credit quality of the portfolio. These credits have been appropriately considered in establishing the allowance for loan losses at September 30, 2006.

Nonperforming assets to ending loans decreased to 0.88% as of September 30, 2006, from 1.02% as of the end of the third quarter of 2005 and decreased from 1.10% on the linked-quarter. Excluding loans held for sale, the nonperforming assets to ending loans ratio as of June 30, 2006, was 0.58%.

Accruing loans, including loans impaired under FASB Statement No. 114, which are past due 90 days or more, for which there is not a likelihood of becoming current, are transferred to nonaccrual loans. However, those loans which management believes will become current and therefore accruing are classified as Accruing loans 90 days or more past due until they become current. First Financial does not have a concentration of credit in any particular industry. The table that follows shows the categories that are included in nonperforming and underperforming assets as of September 30, 2006.

	Quarter Ended					
	Sep. 30	2006 Jun. 30	Excluding loans held for sale	Mar. 31	2005 Dec. 31	Sep. 30

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES**

Liquidity management is the process by which First Financial provides for the continuing flow of funds necessary to meet its financial commitments on a timely basis. These commitments include withdrawals by depositors, funding credit commitments to borrowers, shareholder dividends, paying expenses of operations, and funding capital expenditures. Liquidity is monitored and closely managed by First Financial's asset/liability committee.

Liquidity is derived primarily from deposit growth, maturing loans, the maturity of investment securities, access to other funding sources and markets, and a strong capital position. Total year-to-date average deposits are down \$2,182 from the prior year. Average deposits on a linked quarter basis decreased \$6,670. Short-term borrowings increased \$18,505 from year-end, and long-term borrowings decreased \$218,458.

The principal source of asset-funded liquidity is marketable investment securities, particularly those of shorter maturities. At September 30, 2006, securities maturing in one year or less amounted to \$13,699, representing 3.69% of the total of the investment securities portfolio. In addition, other types of assets such as cash and due from banks, federal funds sold and securities purchased under agreements to resell, as well as loans and interest-bearing deposits with other banks maturing within one year, are sources of liquidity. Total asset-funded sources of liquidity at September 30, 2006, amounted to \$690,594, representing 20.88% of total assets. Sources of long-term asset funded liquidity are derived from the maturity of investment securities and maturing loans in excess of one year.

At September 30, 2006, First Financial had classified \$329,225 in investment securities available-for-sale.

Management examines First Financial's liquidity needs in establishing this classification in accordance with the FASB Statement No. 115 on accounting for certain investments in debt and equity securities.

Liquidity may be used to fund capital expenditures. Capital expenditures were \$12,534 for the first nine months of 2006. In addition, remodeling is a planned and ongoing process given the 87 offices of First Financial and its subsidiaries. Material commitments for capital expenditures as of September 30, 2006, were approximately \$3,422. Management believes that First Financial has sufficient liquidity to fund its current commitments.

First Financial monitors and manages its liquidity position so that funds will be available at a reasonable cost to meet financial commitments, to finance business expansion, and to take advantage of unforeseen opportunities. First Financial manages liquidity to pay dividends to shareholders, to service debt, to invest in subsidiaries, and to satisfy other operating requirements. It also manages the liquidity of its subsidiary bank to meet client cash flow needs while maintaining funds available for loan and investment opportunities. First Financial's subsidiary bank derives liquidity through core deposit growth, maturity of money market investments, and maturity and sale of investment securities and loans. Additionally, its subsidiary bank has access to financial market borrowing sources on an unsecured, as well as a collateralized basis, for both short-term and long-term purposes including, but not limited to, the Federal Reserve and FHLB where the subsidiary bank is a member.

The primary sources of liquidity for First Financial Bancorp are dividends from and returns on investments in its subsidiaries. The bank subsidiary is subject to dividend limits under the rules established by the Office of the Comptroller of the Currency. The Office of the Comptroller of the Currency allows a member bank to make dividends or other capital distributions in an amount not exceeding the current calendar year's net income, plus retained net income of the preceding two years. Distributions in excess of this limit require prior regulatory approval. As of September 30, 2006, the subsidiary bank was able to pay \$2,953 in dividends to the Holding Company without prior regulatory approval.

An additional source of liquidity is the ability of the Holding Company to borrow funds on both a short-term and long-term basis. The Holding Company maintains a \$60,000 short-term revolving credit facility with two unaffiliated banks. As of September 30, 2006, there was \$39,000 outstanding under this credit facility. The current facility matured and was renewed during the third quarter of 2006. The credit agreement also requires First Financial to maintain certain covenants including covenants related to asset quality and capital levels. The Corporation was in full compliance with all material covenants as of September 30, 2006.

Table of Contents**CAPITAL ADEQUACY**

Banks and bank holding companies are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations involve quantitative measures of assets, liabilities, and certain off-balance sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet minimum capital requirements can initiate regulatory action.

Quantitative measures established by regulation to ensure capital adequacy require First Financial to maintain minimum amounts and ratios of total and Tier 1 capital (as defined by the regulations) to risk-weighted assets and of Tier 1 capital to average assets. Management believes, as of September 30, 2006, that First Financial met all capital adequacy requirements to which it was subject. At September 30, 2006, and December 31, 2005, the most recent regulatory notifications categorized First Financial as well-capitalized under the regulatory framework for prompt corrective action. To be categorized as well-capitalized, First Financial must maintain minimum total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the table. There are no conditions or events since that notification that management believes have changed the institution's category.

The following table illustrates the actual and required capital amounts and ratios as of September 30, 2006 and the year ended December 31, 2005.

(Dollars in thousands)	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
September 30, 2006						
Total capital to risk-weighted assets						
Consolidated	\$ 332,302	13.14%	\$ 202,248	8.00%	N/A	10.00%
First Financial Bank	323,807	13.09%	199,150	8.00%	\$ 248,938	10.00%
Tier 1 capital to risk-weighted assets						
Consolidated	300,551	11.89%	101,124	4.00%	N/A	6.00%

FORWARD LOOKING INFORMATION

This document, the documents incorporated by reference and the documents to which we refer you contain statements that are not historical facts and constitute projections, forecasts or forward-looking statements. Words such as estimate , project , plan , believe , expect , anticipate , intend , planned , potential and similar expressions forward-looking statements. These forward-looking statements involve risks and uncertainties and are subject to change based on various important factors, many of which may be beyond our control. Accordingly, our future performance and results may differ materially from those expressed or implied in any such forward-looking statements. The following factors, among others, in some cases have affected and in the future could affect our financial performance and actual results:

the timing and occurrence or non-occurrence of events, including the conditions to our offer, may be subject to circumstances beyond our control;

material adverse changes in economic conditions in the markets of our company;

the potential impact of national and international security concerns on the banking environment, including any possible military action, terrorist attacks or other hostilities;

future regulatory actions;

our ability to implement our strategic and operational initiatives;

the impact of competition;

the demand for financial services in our area;

changes in interest rates;

risks related to consumer acceptance of our products and our ability to develop new products;

the ability to retain, hire and train key personnel; and

other risks and uncertainty inherent in the banking and financial services businesses.

In addition, please refer to our Annual Report on Form 10-K for the year ended December 31, 2005, as well as our other filings with the Commission, for a more detailed discussion of these risks and uncertainties and other factors. We are not under any obligation and do not undertake to make publicly available any update or other revision to any of these forward-looking statements to reflect circumstances existing after the date of this filing or to reflect the occurrence of future events even if experience or future changes make it clear that any projected results expressed or implied herein or in any other document will not be realized.

CRITICAL ACCOUNTING POLICIES

The accounting and reporting policies of First Financial comply with U.S. generally accepted accounting principles and conform to general practices within the banking industry. These policies require estimates and assumptions. Changes in underlying factors, assumptions, or estimates in any of these areas could have a material impact on First Financial's future financial condition and results of operations. In management's opinion, some of these areas have a more significant impact than others on First Financial's financial reporting. For First Financial, these areas currently include accounting for the allowance for loan losses, pension costs, and goodwill.

Allowance for Loan Losses The level of the allowance for loan losses is based upon management's evaluation of the loan and lease portfolios, past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay (including the timing of future payments), the estimated value of any underlying collateral, composition of the loan portfolio, economic

Table of Contents

conditions, and other pertinent factors. This evaluation is inherently subjective, as it requires material estimates including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change. The level of allowance maintained is believed by management to be adequate to cover losses inherent in the portfolio. The allowance is increased by provisions charged to expense and decreased by charge-offs, net of recoveries of amounts previously charged-off. Changes in the allowance can result from changes in economic events, changes in the creditworthiness of the borrowers, or changes in collateral values. The effect of these changes is reflected when known. Though management believes the allowance for loan losses to be adequate as of September 30, 2006, ultimate losses may vary from estimates.

Pension First Financial sponsors a non-contributory defined benefit pension plan covering substantially all employees. In accordance with applicable accounting rules, First Financial does not consolidate the assets and liabilities associated with the pension plan. At the end of 2005, First Financial's fair value of the plan assets was less than its benefit obligation. Therefore, First Financial recognized an accrued benefit liability. Since First Financial was required to recognize an additional minimum liability, it recognized an intangible asset to the extent of its unrecognized prior service cost, which is recalculated on an annual basis. The measurement of the accrued benefit liability and the annual pension expense involves actuarial and economic assumptions. The assumptions used in pension accounting relate to the discount rates, the expected return on plan assets, and the rate of compensation increase.

Goodwill Statement of Financial Accounting Standards No. 142 *Goodwill and Other Intangible Assets* establishes standards for the amortization of intangible assets with indefinite lives and impairment assessment of goodwill. Under these rules, goodwill and intangible assets deemed to have indefinite lives, if any, are not amortized, but are subject to annual impairment tests in accordance with the Statement. First Financial tests for impairment of goodwill as of October 1 each year. If any material events occurred during a quarter that would affect goodwill, impairment testing would be performed. Through its annual impairment testing as of October 1, 2005, First Financial did not identify any impairment of its goodwill. No events occurred since October 1, 2005, requiring another impairment test of goodwill. Assurance cannot be given that future goodwill impairment tests will not result in a charge to income.

ACCOUNTING AND REGULATORY MATTERS

First Financial adopted the provisions of SFAS No. 123(R), *Share-Based Payment*, effective January 1, 2006, using the modified-prospective transition method. Prior to January 1, 2006, First Financial accounted for its stock options under the intrinsic value method of APB Opinion No. 25, *Accounting for Stock Issued To Employees* and related Interpretations, and applied the disclosure-only provisions of SFAS No. 123, *Accounting for Stock-Based Compensation*. First Financial determined the fair value of stock options in the current year using the Black-Scholes valuation model, consistent with the valuation method utilized in prior years under the disclosure-only provisions of SFAS No. 123. Share-based compensation expense for stock options and restricted stock awards included in salaries and employee benefits expense for the first nine months of 2006 was \$1,306 and for the third quarter of 2006 was \$531. Total unrecognized compensation cost related to nonvested share-based compensation was \$4,969 at September 30, 2006 and is expected to be recognized over a weighted average period of 2.6 years.

In March of 2006, the FASB issued SFAS No. 156, *Accounting for Servicing of Financial Assets* an amendment of FASB Statement 140. SFAS No. 156 amends SFAS No. 140 with respect to separately recognized servicing assets and liabilities. SFAS No. 156 requires an entity to recognize a servicing asset or liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract and requires all servicing assets and liabilities to be initially measured at fair value, if practicable. SFAS No. 156 also permits entities to subsequently measure servicing assets and liabilities using an amortization method or fair value measurement method. Under the amortization method, servicing assets and liabilities are amortized in proportion to and over the estimated period of servicing. Under the fair value measurement method, servicing assets are measured at fair value at each reporting date and changes in fair value are reported in net income for the period the change occurs. SFAS No. 156 is effective for fiscal years beginning after September 15, 2006. First Financial is evaluating the effect the implementation of SFAS No. 156 will have on its consolidated financial statements.

Table of Contents

In June of 2006, the FASB issued Interpretation Number (FIN) 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. First Financial is evaluating the effect the implementation of FIN 48 will have on its consolidated financial statements.

In July of 2006, the Emerging Issues Task Force (EITF) of FASB issued a draft abstract for EITF Issue No. 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements. The EITF reached a consensus that for an endorsement split-dollar life insurance arrangement within the scope of this Issue, an employer should recognize a liability for future benefits. At September 30, 2006, First Financial owned \$82,915 of bank owned life insurance. These life insurance policies are generally subject to endorsement split-dollar life insurance arrangements. These arrangements were designed to provide a pre-and postretirement benefit for senior officers and directors of First Financial and its subsidiaries. EITF Issue No. 06-4 will be effective for fiscal years beginning after December 15, 2007. Also in July of 2006, the EITF issued a draft abstract for EITF Issue No. 06-5, Accounting for Purchases of Life Insurance Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4. The EITF reached a consensus for EITF Issue No. 06-5, which includes various considerations regarding what should be included in the determination of the amount that could be realized under the insurance contracts. EITF Issue No. 06-5 will be effective for fiscal years beginning after December 15, 2006. First Financial is evaluating the effect the implementations of both EITF Issue No. 06-4 and No. 06-5 will have on its consolidated financial statements.

In September of 2006, the FASB issued SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of SFAS No. 87, 88, 106, and 132R. SFAS No. 158 requires companies to recognize a net liability or asset and an offsetting adjustment to accumulated other comprehensive income to report the funded status of defined benefit pension and other postretirement benefit plans. The statement requires prospective application, and the recognition and disclosure requirements are effective for fiscal years ending after December 15, 2006. First Financial is evaluating the effect the implementation of SFAS No. 158 will have on its consolidated financial statements.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, foreign exchange rates, and equity prices. The primary source of market risk for First Financial is interest rate risk. Interest rate risk arises in the normal course of business to the extent that there is a difference between the amount of First Financial's interest earning assets and the amount of interest earning liabilities that are prepaid/withdrawn, reprice or mature in specified periods. First Financial seeks to achieve consistent growth in net interest income and capital while managing volatility arising from shifts in market interest rates. The Asset and Liability Committee (ALCO) oversees market risk management, establishing risk measures, limits, and policy guidelines for managing the amount of interest rate risk and its effect on net interest income and capital.

Interest rate risk for First Financial's consolidated balance sheet consists of reprice, option, and basis risks. Reprice risk results from differences in the maturity, or repricing, of asset and liability portfolios. Option risk arises from embedded options such as loan prepayments and security and debt callability. Basis risk refers to the potential for changes in the underlying relationship between market rates or indices, which subsequently result in a narrowing of the net interest margin. Basis risk is also present in managed rate liabilities, such as interest bearing checking accounts and savings accounts, where historical pricing relationships to market rates may change due to the level or directional change in market interest rates.

The interest rate risk position is measured and monitored using earnings simulation models and economic value of equity sensitivity analysis that capture both short-term and long-term interest rate risk exposure. Earnings simulation involves forecasting net interest income under a variety of interest rate scenarios including instantaneous shocks and a forecast of likely interest rate scenarios. Market based prepayment speeds are incorporated into the analysis for loan and securities portfolios.

Presented below is First Financial's interest rate risk position as of September 30, 2006 assuming immediate, parallel shifts in the yield curve:

	-200 basis points	-100 basis points	+100 basis points	+200 basis points
September 30, 2006	(6.98%)	(2.40%)	1.61%	2.58%

Modeling the sensitivity of net interest income to changes in market interest rates is highly dependent on numerous assumptions incorporated into the modeling process. Market based prepayment speeds are factored into the analysis for loan and securities portfolios. Rate sensitivity for transactional deposit accounts is modeled based on results from an external core deposit study.

Additional scenarios are modeled utilizing most-likely interest rates over the next twelve months. Based on this scenario, First Financial has a neutral rate risk position of a negative 0.15% when compared to a base-case scenario with interest rates held constant.

First Financial uses economic value of equity sensitivity analysis to understand the impact of long-term cash flows on earnings and capital. Economic value of equity is based on discounting the cash flows for all balance sheet instruments under different interest rate scenarios. Deposit premiums are based on results from an external core deposit study. Presented below is First Financial's economic value of equity position as of September 30, 2006 assuming immediate, parallel shifts in the yield curve:

	-200 basis points	-100 basis points	+100 basis points	+200 basis points
September 30, 2006	(22.26%)	(8.33%)	5.66%	8.38%

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Management is responsible for establishing and maintaining effective disclosure controls and procedures, as defined under Rule 13a-15 of the Securities Exchange Act of 1934, that are designed to cause the material information required to be disclosed by First Financial in the reports it files or submits under the Securities Exchange Act of 1934 to be recorded, processed, summarized, and reported to the extent applicable within the time periods required by the Securities and Exchange Commission's rules and forms. In designing and evaluating the disclosure controls and procedures, management recognized that a control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

As of the end of the period covered by this report, First Financial performed an evaluation under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures pursuant to Rule 13a-15 of the Securities Exchange Act of 1934. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

No changes were made to the Corporation's internal control over financial reporting (as defined in Rule 13a-15 under the Securities Exchange Act of 1934) during the last fiscal quarter that materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.

Table of Contents**PART II-OTHER INFORMATION**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) The following table shows the total number of shares repurchased in the third quarter of 2006.

Issuer Purchases of Equity Securities

Period	(a) Total Number of Shares Purchased (1)	(b) Average Price Paid Per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans (2)	(d) Maximum Number of Shares that may yet be purchased Under the Plans
July 1 through July 31, 2006	1,939	\$ 15.14	0	7,373,105
August 1 through August 31, 2006	76,000	15.49	76,000	7,297,105
September 1 through September 30, 2006	76,000	15.69	76,000	7,221,105
Total	153,939	\$ 15.58	152,000	7,221,105

(1) The number of shares purchased in column (a) and the average price paid per share in column (b) include the purchase of shares other than through publicly announced plans. The shares purchased other than through publicly announced plans were purchased pursuant to First Financial's Thrift Plan, Director Fee Stock Plan, 1999 Stock Option Plan for Non-Employee

Directors and 1999 Stock Incentive Plan for Officers and Employees. (The last two plans are referred to hereafter as the Stock Option Plans.) The following tables show the number of shares purchased pursuant to those plans and the average price paid per share. The purchases for the Thrift Plan and the Director Fee Stock Plan were made in open-market transactions. Under the Stock Option Plans, shares were purchased from plan participants at the then current market value in satisfaction of stock option exercise prices.

Table of Contents

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid Per Share
First Financial Bancorp Thrift Plan		
July 1 through July 31, 2006	0	\$ 0.00
August 1 through August 31, 2006	0	0.00
September 1 through September 30, 2006	0	0.00
Total	0	\$ 0.00
Director Fee Stock Plan		
July 1 through July 31, 2006	1,939	\$ 15.14
August 1 through August 31, 2006	0	0.00
September 1 through September 30, 2006	0	0.00
Total	1,939	\$ 15.14
Stock Option Plans		
July 1 through July 31, 2006	0	\$ 0.00
August 1 through August 31, 2006	0	0.00
September 1 through September 30, 2006	0	0.00
Total	0	\$ 0.00

(2) First Financial has two publicly announced stock repurchase plans under which it is currently authorized to purchase shares of its common stock. Neither of the plans expired during this quarter. The table that follows provides additional information regarding those plans.

Announcement Date	Total Shares Approved for Repurchase	Expiration Date
2/25/2003	2,243,715	None
1/25/2000	7,507,500	None
