ITEM 1.01 ENTRY INTO A MATERIAL DEFINITIVE AGREEMENT

The following is a description of the 2005 Annual Incentive Compensation Plan (the "2005 Incentive Program") that was adopted by the Compensation and Management Development Committee (the "Compensation Committee") of the Board of Directors on February 1, 2005. The Incentive Program is effective for calendar year 2005 and the purpose of the program is to motivate key management personnel to achieve or exceed corporate financial goals.

The chief executive officer and all other executive officers, as well as other officers and managers, are eligible to participate in the 2005 Incentive Program.

Incentive payments under the 2005 Incentive Program are based on the achievement of return on equity, net operating cash flow return on investment and specific cost maintenance or cost reduction goals (which vary among business units). The performance measures established by the Compensation Committee for 2005 include threshold, target and maximum performance goals, and the relative weighting of the performance measures.

Incentive payment targets are expressed as a percentage of salary and were established for each job grade with eligible participants. Payout percentages range from 25% for achievement of the threshold goal, to 100% for achievement of the target goal, to 200% for achievement of the maximum goal. A personal performance multiplier for each participant will be applied to the final formula incentive payment, ranging from 0 to 1.25.

Incentive payments (if any) will be made in March 2006. Participants must remain employees through December 31, 2005 to be eligible for payments under the 2005 Incentive Program; provided, however, that participants whose employment is terminated during 2005 as a result of death, disability, layoff or retirement may be eligible to receive pro rata incentive payments. All payments under the 2005 Incentive Program must be approved by the Compensation Committee. The Compensation Committee, in its sole discretion, may adjust awards beyond the program's established parameters.
